CSR: UPI - BUILDING A SMARTER WAY TO HANDLE E-WASTE

“TOGETHER, WE CAN TURN E-WASTE INTO ECO-PROGRESS.”

ECO WARRIORS AT WORK

Employees of UAM Philippines, Inc. actively participated in an e-waste collection drive today, bringing in their old and unused electronic devices for proper disposal. This initiative, held in collaboration with Environcycle, highlights the company's continued commitment to environmental sustainability and responsible waste management.

Throughout the activity, employees turned in a variety of electronic waste, including mobile phones, chargers, batteries, and other outdated or non-functioning devices.

This guarantees that recyclable components are recovered efficiently, while non-recyclable and hazardous materials are disposed of safely and responsibly. Such partnerships play a crucial role in strengthening efforts toward sustainable waste solutions. The activity also served as an opportunity to encourage employees to be more mindful of their consumption and disposal habits.

These materials, if not properly handled, can pose serious environmental risks due to the hazardous substances they contain. By ensuring proper collection and recycling, the initiative helps prevent harmful components from contaminating landfills and surrounding ecosystems. The collaboration with Environcycle ensures that all collected e-waste will be processed following proper environmental standards.

THINK SMART, RECYCLE SMART

As technology continues to evolve rapidly, the accumulation of obsolete devices becomes inevitable. Initiatives like this provide a practical and accessible way for individuals to take part in environmental protection through simple yet impactful actions. Beyond its environmental benefits, the e-waste collection drive fostered a sense of unity and shared responsibility among employees.

Participation across different departments demonstrated a collective effort to support the company's sustainability goals, reinforcing a culture of environmental awareness within the workplace.

Through initiatives like this, UAM Philippines, Inc. reinforces its commitment to sustainability. Together with Environcycle, the company takes practical steps toward reducing its environmental impact and promoting a cleaner future.
